At a glance, the Imagine display gives customers a view of all twelve of the new Milliken products. Retailers will benefit from the display's versatility, using it as a wall display (side by side, as shown) or an island display (back to back). Each pattern is featured in a large 24" x 34" sample along with a complementary color board. The large feature samples are independent of the color boards, allowing the customer to drape their selection on the floor or place it over a pad sample for the ultimate "walk test".
